3. It **drinks a lot of water.** / **eats a lot of plants.**
4. There are now over 1,000 wild Arabian oryx in **different countries.** / **Qatar.**

⊙ Read and check.

The Arabian oryx lives in the desert. It has white fur. This helps it keep its temperature down. The oryx eats a lot of plants to get water from them. Water is precious when you live in the desert. The Arabian oryx likes to walk. It is a slow animal, but it can walk several kilometers in one night. Its feet are adapted to walking on hot sand easily.

In the past, people used to kill the Arabian oryx for its meat and skin. In 1972, it was declared extinct in the wild.

The Arabian Oryx: Qatar's National Animal

This meant that there were only Arabian oryx in zoos. But now, things have changed. There are over 1,000 wild Arabian oryx in the Middle East. There are even two natural reserves in Qatar. These are large areas of land where animals can live peacefully.

2. Richard didn't like his new school, so he went home early.

Dear diary,

Today was my first day at my new school. I was nervous because it's a big school, and we have to change classrooms for different subjects. But my teacher introduced me to Mark. He helped me the whole day, and now he's my friend. The principal said we can't eat in class, but we can eat in the cafeteria. At recess, we don't have to go to the playground, but Mark and I like playing soccer, so we went out. We joined a soccer club, so we can play after school, too. Mark invited me to go to his house this weekend. We don't have to do homework on the weekends, so I think I can go.

I think I'm going to like my new school!
